void display() {
    int i;
    if (isEmpty())
        printf("\n Empty Queue\n");
    else {
        printf("\n Front → %d", front);
        printf("\n Rear → ");
        for (i = front; i != rear; i = (i+1) % SIZE)
            printf("\n %d", arr[i]);
        printf("\n Rear → %d", rear);
    }
    printf("\n");
}

```

```

void main()
{
    int option, val;
    int ele;
    do
    {
        printf("1. Insert\n");
        printf("2. Delete\n");
        printf("3. Display\n");
        printf("4. Exit\n");
        printf("Enter your option : \n");
        scanf("%d", &option);
        switch (option)
        {

```

Case 1:

```

            printf("Enter the element : ");
            scanf("%d", &ele);
            enqueue(ele);
            break;

```

```

Case 2: val = delQueue();
        if (val != -1)
            printf("the number deleted is: %d", val);
            break;
Case 3: display();
        break;
    }
} while (option != 4);
}

```

Output:-

```

1. insert
2. delete
3. Display
4. Exit
enter your option:
1

```

enter the element: 2

inserted → 2

```

1. insert
2. delete
3. Display
4. Exit
enter your option:
1

```

enter the element: 6

inserted → 6

1. Insert

2. Delete

3. Display

4. Exit

Enter your option :

2

Deleted element \rightarrow 2

The number deleted is 2

1. Insert

2. Delete

3. Display

4. Exit

enter your option :

3

Print \rightarrow 1

Item \rightarrow 6

Rear \rightarrow 1
